Work History

Lead Frontend Developer
JIBit

Aug 2019 - Present

Jibit is a FinTech company, aiming to remove financial complexity through building Fintech infrastructure solutions, Enterprise financial services, Smart payments solutions for startups.

I'm Lead Frontend Developer. In our team we build our own Framework which is used to develop all our Panels.

- Collaborate with UI/UX designers, back-end developers, and stakeholders to gather requirements and ensure project success.
- Propose and contribute to the design of our own internal framework (a.k.a Pixel) based on Angular to make development and maintenance of other web panels about 4 times more efficient.
- Migrate all old web panels to use the unified internal frameworks.
- Develop and Manage Landing Pages, Blogs, email templates and keep the styles shared between all projects.
- Participate in Agile ceremonies, including daily stand-ups, sprint planning, and retrospectives.
